

## START - UP

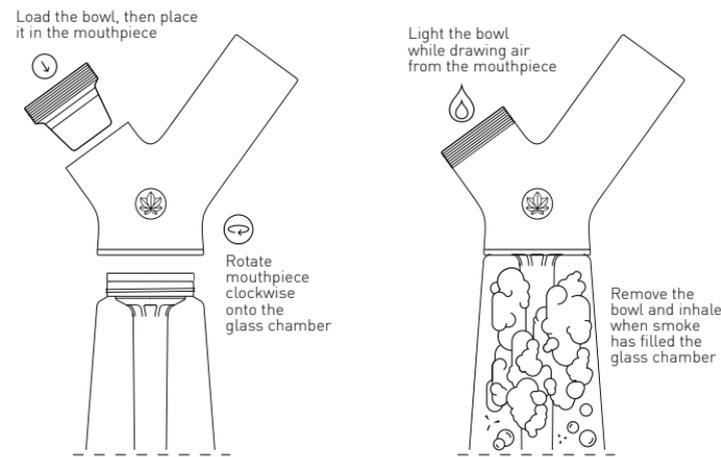

### Disassemble, Rinse with water

Remove Heir Waterpipe from the box and disassemble. Unscrew the mouthpiece from the glass by rotating it counter-clockwise. Rinse all pieces with warm water before proceeding.

### Fill water, Insert downstem

Fill water in glass chamber to 2in (5cm) height. Insert the downstem, and check that the water level is above the percolation holes at the bottom of the downstem.

## START - UP

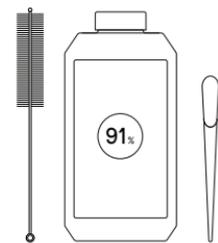

### Load a bowl, Re-assemble

With the downstem inside the glass chamber, place the mouthpiece onto the glass chamber and rotate it clockwise. Tighten liberally, until you cannot rotate the mouthpiece further.

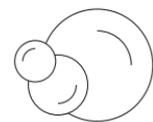

### Taking a hit

Place flame to smoking product while inhaling from the mouthpiece. Smoke will fill the glass chamber. When ready to inhale, remove the bowl while continuing to draw breath in.

## CLEANING AND CARE

Cleaning brush, Isopropyl alcohol, and Smoke Tool

Machine wash only with steam/heat dry disabled

### Bowl Piece

Clear ash from the bowl between sessions using the included Smoke Tool. Resin will build up inside after several sessions, and a deep clean will refresh the taste and appearance of the bowl. To deep clean the bowl; soak in isopropyl alcohol for one hour, scrub until free of resin, rinse with water, then air dry.

### Glass Chamber

Replace the water every smoke session to prevent residue from building up inside. To deep clean the Glass Chamber; fill isopropyl alcohol to just above the line of residue inside the glass, soak in isopropyl alcohol for one hour, use the cleaning brush to scrub the interior, rinse with water, then air dry.

### Mouthpiece and Downstem

To clean; dip the cleaning brush in isopropyl alcohol, scrub the interior of these parts, rinse with water, then air dry.

## PRECAUTIONS AND DISCLAIMERS

>2500°F

Do not use with butane-torch lighters

For use with legal herbal smoking blends by those of legal smoking age.

Do not use a butane torch lighter with the Heir Waterpipe bowl piece. Stainless steel is not intended to be heated to dabbing temperatures.

Heir Waterpipe is for use with legal herbal smoking blends (mugwort, mullein) by those of legal smoking age only. Do not use with illegal smoking products, and do not store where accessible to minors.

Smoking is known to be detrimental to your health. Practice moderation and consult with your doctor about the risks. Mold and bacteria will accumulate within the pipe if not washed regularly.

Keep Heir Waterpipe out of high traffic areas, such as on a coffee table. Cleaning is when parts are most frequently broken, so exercise caution while loading parts in the sink. Do not clean in temperatures exceeding 200 degrees Fahrenheit. If a part does break, take care when cleaning up sharp fragments.
